

# Highgrove Dental Care

---

*Personalized & Comfortable*

## 12 Reasons Why Dr. O'Neill *should* be your dentist!

1. No lectures no matter what. Just information about dental needs with respect.
2. Professional, caring, long term staff to make you comfortable.
3. Convenient hours, location, and parking.
4. We will make insurance easy for you.
5. We will answer all of your questions and concerns.
6. We will present all choices for treatment and the advantages or disadvantages of each including cost.
7. We are committed to giving you the best experience possible. Our experience with dental phobic patients requiring sedation for treatment has helped us to treat all patients more comfortably.
8. We use specially formulated prescription topical anesthetic and a patented device to change anesthetic from acid to neutral, like water, for far greater comfort with the delivery of anesthetic. Less than 0.5% of dentists currently have this device.
9. Many people do not get completely numb with local anesthetic. This is caused by extra nerves or slightly different body chemistry. Both of these problems can be resolved with the proper use of anesthetic. If you have a history of dentistry still being painful even with novacaine we can help you to have the same pain free experience that most patients have. Really.
10. Highly experienced and trained in cosmetic dentistry. Dr. O'Neill will create a beautiful, natural smile. No fake smiles.
11. We offer a variety of payment plans including no interest financing.
12. Free consultation or second opinion for any dental question you may have.
